

Bio: Upamanyu Madhow is Distinguished Professor of Electrical and Computer Engineering at the University of California, Santa Barbara. His current research interests focus on next generation communication, sensing and inference infrastructures centered around millimeter wave systems, and on robust machine learning. Dr. Madhow is an IEEE Fellow, recipient of the 1996 NSF CAREER award, co-recipient of the 2012 IEEE Marconi prize paper award in wireless communications, and recipient of a Distinguished Alumni award in 2018 from the ECE department at the University of Illinois at Urbana-Champaign. He is the author of two textbooks published by Cambridge University Press, *Fundamentals of Digital Communication* (2008) and *Introduction to Communication Systems* (2014). He is co-inventor on 30 US patents, and has been involved in several successful technology transfer efforts.
